Dear Parents/Carers

Recently, your child has been enjoying learning all about 3D printing in their computing lessons, where they have been learning all about how to use 3D modeling software to create an object to print.

To encourage them to further develop these STEM (Science, Technology, Engineering and Mathematics) skills I would like to offer your child the opportunity to attend STEM club up until the Christmas holiday initially.

As part of the club, your child will have the opportunity to design and print an object for a specific purpose that they will choose. Previously, children have chosen to design and print an ornament, a personalised phone holder or a toy. If time permits, I will also explore other aspects of STEM with them.

The club is free and will run on a Monday after-school until 4:15pm with a limited number of places available.

I look forward to seeing the children's imagination come to life.

Yours sincerely

Mr Winfield
