

Target	Example Questions	Ideas to try:
Recognise the place value of digits in three-digit numbers (using 100, 10s and 1s).	<ul style="list-style-type: none"><li>In the number 8 hundreds, 3 tens and 6 ones together make ____.</li><li>457 is made of ____ hundreds, ____ tens and ____ ones.</li><li>What does the 6 represent in 167?</li></ul>	<ul style="list-style-type: none"><li>Play 'I'm thinking of a number': e.g. I'm thinking of a number and it has 3 hundreds, 5 tens and 2 ones. What is my number?</li><li>Play 'clap, click, tap': say a three-digit number, children to clap the hundreds value, click the tens and then tap their legs for the ones.</li><li>Play 'roll to win': layout 3 boxes each, as shown below, then take it in turns to roll a dice. Place the number into your grid to try and make the biggest number.</li></ul> <p>Player 1                      Player 2</p> <p><input type="text"/> <input type="text"/> <input type="text"/>                      <input type="text"/> <input type="text"/> <input type="text"/></p>
Read and write numbers up to 1,000 using digits and words.	<ul style="list-style-type: none"><li>Write the number 154 in words.</li></ul>	<ul style="list-style-type: none"><li>Play bingo: each player to write out 5 numbers (in-between ... and ...) in word form and then call out the number and they can cross it off.</li><li>Practise the spelling of these words at home.</li></ul>
Compare and order numbers up to 1,000.	<ul style="list-style-type: none"><li>Write down two numbers smaller than 1000; ask your child to circle the smaller number.</li><li>Order from smallest to biggest: 16 192 163 and 173.</li></ul>	<ul style="list-style-type: none"><li>Play true or false using statements related to this target: e.g. 299 is bigger than 461.</li></ul>
Add and subtract numbers mentally, including adding 1s, 10s or 100s to a 3-digit number.	<ul style="list-style-type: none"><li><math>162 + 6 =</math></li><li><math>173 - 7 =</math></li><li><math>201 + 10 =</math></li><li><math>372 - 50 =</math></li><li><math>271 - 100 =</math></li></ul>	<ul style="list-style-type: none"><li>Each think of a 3 digit number, roll a dice and the number to your 3 digit number. This could be repeated for subtraction, or use the dice to represent a tens or hundreds number.</li><li>Give your child a number in a circle. They then write all of the addition and subtraction facts they can think of about that number around it.</li></ul>

<p>Use the standard column method for addition.</p>	<ul style="list-style-type: none"> <li>Use the column method to solve <math>261 + 103</math>.</li> <li>Use the column method to solve <math>349 + 173</math>.</li> </ul>	<ul style="list-style-type: none"> <li>Practise calculations using this method:</li> </ul> $\begin{array}{r} 56 \\ + 39 \\ \hline 95 \\ \hline 1 \end{array}$
<p>Use the standard column method for subtraction.</p>	<ul style="list-style-type: none"> <li>Use the column method to solve <math>168 - 134</math>.</li> <li>Use the column method to solve <math>183 - 92</math>.</li> </ul>	<ul style="list-style-type: none"> <li>Practise calculations using this method:</li> </ul> <p><math>932 - 457</math> becomes</p> $\begin{array}{r} \phantom{0}8 \phantom{0}12 \phantom{0}1 \\ 9 \phantom{0}3 \phantom{0}2 \\ - 4 \phantom{0}5 \phantom{0}7 \\ \hline 4 \phantom{0}7 \phantom{0}5 \end{array}$
<p>Learn the 3x, 4x and 8x tables and the related division facts.</p>	<ul style="list-style-type: none"> <li>What is <math>8 \times 4</math>?</li> <li>What is <math>8 \times 8</math>?</li> <li>What is <math>4 \times 7</math>?</li> <li>What is the relationship between these calculations? <math>3 \times 4</math>   <math>4 \times 3</math></li> <li>There are 2 bags of bread rolls that have 8 rolls in each bag. How many rolls are there altogether?</li> </ul>	<ul style="list-style-type: none"> <li>Have a 'fact of the day' (e.g. <math>2 \times 8 = 16</math>). Pin this fact up around the house. Practise reading it in a quiet, loud, squeaky voice etc. Ask your child over the day if they can recall the fact.</li> <li>Practise singing times table songs.</li> <li>Play Bingo: each player chooses five answers (e.g. multiples of 8 to practise the eight times table etc.). Ask a question and if a player has the answer, they can cross it off.</li> </ul>
<p>Add and subtract amounts of money, including giving change.</p>	<ul style="list-style-type: none"> <li>A pencil costs 45p, how much change do I get from <math>\pounds 1</math>?</li> <li><math>\pounds 2.60 + \underline{\hspace{1cm}} = \pounds 5</math></li> <li>If I buy a sandwich for <math>\pounds 2.20</math> and a drink for 90p, how much change do I get from <math>\pounds 5</math>?</li> </ul>	<ul style="list-style-type: none"> <li>When shopping with your child, select two or three items. Ask them to work out the total amount spent and how much change you will get.</li> </ul>
<p>Tell the time to the nearest minute using an analogue clock.</p>	<ul style="list-style-type: none"> <li>What time will it be one hour from now?</li> <li>What time is shown on this clock?</li> </ul>	<ul style="list-style-type: none"> <li>At any available opportunity, practise telling the time with your child.</li> </ul>
