

ALDERMAN JACOBS PRIMARY SCHOOL (ACADEMY TRUST)

Online Safety Policy

Aim

Our school aims to:

- Have robust processes in place to ensure the online safety of pupils, staff, volunteers and governors
- Deliver an effective approach to online safety, which empowers us to protect and educate the whole school community in its use of technology
- Establish clear mechanisms to identify, intervene and escalate an incident, where appropriate

Legislation and Guidance

This policy is based on the Department for Education's statutory safeguarding guidance, [Keeping Children Safe in Education](#), and its advice for schools on [preventing and tackling bullying](#) and [searching, screening and confiscation](#). It also refers to the Department's guidance on [protecting children from radicalisation](#).

It reflects existing legislation, including but not limited to the [Education Act 1996](#) (as amended), the [Education and Inspections Act 2006](#) and the [Equality Act 2010](#). In addition, it reflects the [Education Act 2011](#), which has given teachers stronger powers to tackle cyber-bullying by, if necessary, searching for and deleting inappropriate images or files on pupils' electronic devices where they believe there is a 'good reason' to do so.

The policy also takes into account the [National Curriculum computing programmes of study](#).

This policy complies with our funding agreement and articles of association.

Roles & Responsibilities

Governing Body

The governing body is accountable for ensuring that our school has effective policies and procedures in place; as such they will:

- Review this policy at least annually and in response to any internet safety incident to ensure that the policy is up to date, covers all aspects of technology use within the school, to ensure Internet safety incidents were appropriately dealt with and ensure the policy was effective in managing those incidents.
- Appoint one trustee to have overall responsibility for the governance of Internet Safety at the school who will:
 - Keep up to date with emerging risks and threats through technology use.
 - Receive regular updates from the Headteacher in regards to training, identified risks and any incidents.
 - Chair the internet safety Committee

Headteacher

Reporting to the governing body, the Headteacher has overall responsibility for internet safety within our school. The day-to-day management of this will be delegated to a member of staff, the internet safety Officer (or more than one), as indicated below.

The Headteacher will ensure that:

- Internet Safety training throughout the school is planned and up to date and appropriate to the recipient, i.e. students, all staff, senior leadership team and governing body, parents.
- The designated internet safety Officer(s) has had appropriate Continued Professional Development (CPD) in order to undertake the day to day duties.
- All internet safety incidents are dealt with promptly and appropriately.
- All incidents of sexting are dealt with through the Safeguarding and Child Protection policy and procedures.

Internet safety Officer

The day-to-day duty of internet safety Officer is devolved to *Adam Winfield*.

(Note: this is often a combined role, e.g. Child Protection Officer, computing Coordinator)

The internet safety Officer will:

- Keep up to date with the latest risks to children whilst using technology; familiarise himself with the latest research and available resources for school and home use.
- Review this policy regularly and bring any matters to the attention of the Headteacher.
- Advise the Headteacher, governing body on all internet safety matters.
- Engage with parents and the school community on internet safety matters at school and/or at home.
- Liaise with the local authority, IT technical support and other agencies as required.
- Liaise with Child Protection Designated Personnel on incidents of internet safety issues
- Ensure any technical internet safety measures in school (e.g. Internet filtering software, behaviour management software) are fit for purpose through liaison with the local authority and/or computing Technical Support.
- Make herself aware of any reporting function with technical internet safety measures, i.e. internet filtering reporting function; liaise with the Headteacher and responsible governor to decide on what reports may be appropriate for viewing.

Computing Technical Support Staff

Technical support staff are responsible for ensuring that:

- The IT technical infrastructure is secure; this will include at a minimum:
 - Anti-virus is fit-for-purpose, up to date and applied to all capable devices.
 - Windows (or other operating system) updates are regularly monitored and devices updated as appropriate.
 - Any internet safety technical solutions such as Internet filtering are operating correctly.
 - Filtering levels are applied appropriately and according to the age of the user; that categories of use are discussed and agreed with the internet safety officer and Headteacher.
 - Passwords are applied correctly to all users regardless of age. Passwords for staff will be subject to change every 3 months.
 - Pupil passwords, as children only use the network under supervision do not need changing, as advised by County support.

All Staff

Staff are to ensure that:

- All details within this policy are understood. If anything is not understood it should be brought to the attention of the Headteacher.

- Any internet safety incident is treated as a Child Protection matter and appropriate measures taken. If you are unsure the matter is to be raised with the internet safety Officer or the Headteacher to make a decision.

All Students

The boundaries of use of computing equipment and services in this school are given in the student Acceptable Use Policy; any deviation or misuse of computing equipment or services will be dealt with in accordance with the behaviour policy.

Internet safety is embedded into our curriculum; students will be given the appropriate advice and guidance by staff. Similarly all students will be fully aware how they can report areas of concern whilst at school or outside of school.

Parents and Carers

Parents play the most important role in the development of their children; as such the school will ensure that parents have the skills and knowledge they need to ensure the safety of children outside the school environment. Through parents' evenings, school newsletters, information on the school website and an annual parent's internet safety event, the school will keep parents up to date with new and emerging internet safety risks, and will involve parents in strategies to ensure that students are empowered.

Parents must also understand the school needs to have rules in place to ensure that their child can be properly safeguarded. As such parents will sign the student Acceptable Use Policy before any access can be granted to school computing equipment or services.

Achievement Committee

Chaired by the Governor responsible for internet safety, the achievement Committee is responsible:

- To advise on changes to the internet safety policy.
- To establish the effectiveness (or not) of internet safety training and awareness in the school.
- To recommend further initiatives for internet safety training and awareness at the school.

Established from volunteer students, parents, internet safety Officer, responsible Governor and others as required the achievement Committee will meet on a termly basis.

Definitions

Users - refers to staff, governing body, school volunteers, students and any other person working in or on behalf of the school, including contractors.

Parents - any adult with a legal responsibility for the child/young person outside the school e.g. parent, guardian, carer.

School - any school business or activity conducted on or off the school site, e.g. visits, conferences, school trips etc.

Wider school community - students, all staff, governing body, parents and other relatives.

Safeguarding is a serious matter; at AJS we use technology and the Internet extensively across all areas of the curriculum. Online safeguarding, known as internet safety is an area that is constantly evolving and as such this policy will be reviewed on an annual basis or in response to an internet safety incident, whichever is sooner.

The primary purpose of this policy is twofold:

- To ensure the requirement to empower the whole school community with the knowledge to stay safe and risk free is met.
- To ensure risks are identified, assessed and mitigated (where possible) in order to reduce any foreseeability of harm to the student or liability to the school.

This policy is available for anybody to read on the AJS website; upon review all members of staff will sign as read and understood both the internet safety policy and the Staff Acceptable Use Code of Conduct Policy. A copy of this policy and the Students Acceptable Use Code of Conduct Policy will be sent home with students at the beginning of each school year with a permission slip. Upon return of the signed permission slip and acceptance of the terms and conditions, students will be permitted access to school technology including the Internet.

Technology

AJS uses a range of devices including Chromebooks, PC's, laptops, iPads, Kindle Fire. In order to safeguard the student and in order to prevent loss of personal data we employ the following assistive technology:

Internet Filtering

We use an Enhanced Web Filtering Service provided by the computing service for Cambridgeshire that prevents unauthorised access to illegal websites. It also prevents

access to inappropriate websites; appropriate and inappropriate is determined by the age of the user and will be reviewed in line with this policy or in response to an incident, whichever is sooner. The computing Coordinator—and IT Support are responsible for ensuring that the filtering is appropriate and that any issues are brought to the attention of the Headteacher.

Email Filtering

We use Gmail for education that prevents any infected email to be sent from the school or to be received by the school. Infected is defined as: an email that contains a virus or script (i.e. malware) that could be damaging or destructive to data; spam email such as a phishing message.

Encryption

All school devices that hold personal data (as defined by the Data Protection Act 1998) are encrypted. No data is to leave the school on an un-encrypted device; all devices that are kept on school property and which may contain personal data are encrypted. Any breach (i.e. loss/theft of a device such as laptop or iPad) is to be brought to the attention of the Headteacher immediately. The Headteacher will liaise with the local authority to ascertain whether a report needs to be made to the Information Commissioner's Office.

Passwords - all staff and students will be unable to access any device on the network without a unique username and password which is the same as the username and password for their Google Account. Staff passwords will change on a 3 monthly basis or if there has been a compromise, whichever is sooner. Passwords have been set up to autochange. Pupil passwords will not be changed unless a security breach has been identified and reported to the computing leaders.

Devices that are not password enabled such as an iPad should be cleared of all personal data and files after use. Staff must ensure that Find my Ipad is enabled if their device is not on the school mdm system and is disabled prior to returning the iPad to school, which will allow staff members to redeploy the device without requesting personal passwords.

Anti-Virus

All capable devices will have anti-virus software. This software will be updated at least weekly for new virus definitions. IT Support will be responsible for ensuring this task

is carried out, and will report to the Headteacher if there are any concerns. All USB peripherals such as key drives are not to be used in school or for school related work.

Safe Use

Internet

Use of the Internet in school is a privilege, not a right. Internet use will be granted: to staff upon signing this internet safety and the staff Acceptable Use Policy; students upon signing and returning their acceptance of the Acceptable Use Policy.

Google Suite for Education

Students are permitted to use Google Suite for Education and will be issued with their own school based Google account. Each class has an online 'Classroom' which every pupil can access using any internet enabled device. All school online activity should be done through this system and monitored in the first place by the class teacher. Staff should be proactive in teaching the children to be responsible online citizens and encouraging positive online activity and reactive to deal appropriately with any misuse. Child protection procedures should be followed where necessary.

Parents are encouraged to work with their children within the Google Classroom, but do not have permission to use any of the data held within (see Acceptable Use Policy for further guidance)

Email

All staff are reminded that emails are subject to Freedom of Information requests, and as such the email service is to be used for professional work-based emails only. Emails of a personal nature are not permitted. Similarly use of personal email addresses for work purposes is not permitted.

At present pupils do not have access to the email feature although this could be activated should it be required.

Photos and videos

Digital media such as photos and videos are covered in the schools' Mobile Phone and Camera Use Policy, and is re-iterated here for clarity. All parents have an option to refuse permission for their child to be photographed or videoed when they join the school and have the option to change their preferences at any time by informing the school in writing.

Social Networking

There are many social networking services available; AJS is fully supportive of social networking as a tool to engage and collaborate with learners, and to engage with parents and the wider school community. The following social media services are permitted for use within AJS and have been appropriately risk assessed; should staff wish to use other social media, permission must first be sought via the internet safety Officer who will advise the Headteacher for a decision to be made. Any new service will be risk assessed before use is permitted.

- Google Classroom
- School website

A broadcast service is a one-way communication method in order to share school information with the wider school community. No persons will be "followed" or "friended" on these services and as such no two-way communication will take place.

In addition, the following is to be strictly adhered to:

- Permission slips (via the school photographic policy) must be consulted before any image or video of any child is uploaded.
- There is to be no identification of students using first name and surname; first name only is to be used.
- Where services are "comment enabled", comments are to be monitored by the class teacher or page host.
- All posted data must conform to copyright law; images, videos and other resources that are not originated by the school are not allowed unless the owner's permission has been granted or there is a licence which allows for such use (i.e. creative commons).

Instant Chat and Message Apps

The minimum age to use these apps is 13 years old. If school becomes aware of use of these apps by pupils, who are under the minimum age, then the parents/carers will be contacted by the Child Protection Officer.

Pupils, especially those in the older year groups choose to communicate with each other and with online 'friends' using instant messaging and chat apps like Instagram and WhatsApp? Although there are no plans to use these tools in school, teachers should be aware of their use and be prepared to deal with any potential issues as they arise. Adults in school should not underestimate the power of these apps and the potential influence that they have on the lives of the young people in school. Open and frank discussions

about online responsibility should take place throughout the school year not just in designated internet safety sessions.

Live Streaming

The increased popularity of 'Live Streaming' is an area that all staff should be mindful of, due to the potential of abuse. Although this activity should not be taking place in school it is still an area where staff will need to be vigilant. All staff should be prepared to discuss this in a neutral way through internet safety sessions.

Google Meet is a live streaming video chat that can be incorporated into Google Classroom. It is not yet a policy to use this although staff are encouraged to make use of it for professional discussion. The exception to this would be in the case of Remote Learning taking place in which case the Remote Learning policy should be applied.

Notice and take down policy

Should it come to the schools attention that there is a resource which has been inadvertently uploaded, and the school does not have copyright permission to use that resource, it will be removed within one working day.

Incidents

Any Internet Safety related incident is to be brought to the immediate attention of a designated Child Protection Officer, or in his/her absence the Headteacher. The incident should be dealt with in the same way as any other Child Protection concern and the relevant form completed and filed.

Any issues concerning the production and distribution of sexting images involving anyone under the age of 18 is illegal and needs careful management for all those involved. If a device is involved it will be confiscated and set to flight mode, where possible, or switched off while investigations are carried out.

Radicalisation and Extremism

All staff are aware through the annual staff PREVENT training of their roles and responsibilities in reducing the potential for groups or individuals of becoming involved in potentially extreme groups. Any suspicions must be dealt with immediately using the school child protection policy and referred to the police as appropriate.

Cyber-bullying

Definition: Cyber-bullying takes place online, such as through social networking sites, messaging apps or gaming sites. Like other forms of bullying, it is the repetitive, intentional harming of 1 person or group by another person or group, where the relationship involves an imbalance of power. (See also the school behaviour policy.)

Preventing and addressing cyber-bullying

To help prevent cyber-bullying, we will ensure that pupils understand what it is and what to do if they become aware of it happening to them or others. We will ensure that pupils know how they can report any incidents and are encouraged to do so, including where they are a witness rather than the victim.

The school will actively discuss cyber-bullying with pupils, explaining the reasons why it occurs, the forms it may take and what the consequences can be. Class teachers will discuss cyber-bullying with their tutor groups.

Teaching staff are also encouraged to find opportunities to use aspects of the curriculum to cover cyber-bullying. This includes personal, social, health and economic (PSHE) education, and other subjects where appropriate.

All staff, governors and volunteers (where appropriate) receive training on cyber-bullying, its impact and ways to support pupils, as part of safeguarding training.

The school will also provide relevant information/leaflets on cyber-bullying to parents so that they are aware of the signs, how to report it and how they can support children who may be affected.

In relation to a specific incident of cyber-bullying, the school will follow the processes set out in the school behaviour policy. Where illegal, inappropriate or harmful material has been spread among pupils, the school will use all reasonable endeavours to ensure the incident is contained.

The DSL will report the incident and provide the relevant material to the police as soon as is reasonably practicable, if they have reasonable grounds to suspect that possessing that material is illegal. They will also work with external services if it is deemed necessary to do so.

Examining electronic devices

The headteacher, and any member of staff authorised to do so by the headteacher can carry out a search and confiscate any electronic device that they have reasonable grounds for suspecting:

- Poses a risk to staff or pupils, and/or
- Is identified in the school rules as a banned item for which a search can be carried out, and/or
- Is evidence in relation to an offence

Before a search, if the authorised staff member is satisfied that they have reasonable grounds for suspecting any of the above, they will also:

- Make an assessment of how urgent the search is, and consider the risk to other pupils and staff. If the search is not urgent, they will seek advice from an appropriate member of staff (for example DSL/headteacher)

- Explain to the pupil why they are being searched, how the search will happen, and give them the opportunity to ask questions about it
- Seek the pupil's cooperation

Authorised staff members may examine, and in exceptional circumstances erase, any data or files on an electronic device that they have confiscated where they believe there is a 'good reason' to do so.

When deciding whether there is a 'good reason' to examine data or files on an electronic device, the staff member should reasonably suspect that the device has, or could be used to:

- Cause harm, and/or
- Undermine the safe environment of the school or disrupt teaching, and/or
- Commit an offence

If inappropriate material is found on the device, it is up to a member of the senior leadership team/DSL to decide on a suitable response. If there are images, data or files on the device that staff reasonably suspect are likely to put a person at risk, they will first consider the appropriate safeguarding response.

When deciding if there is a good reason to erase data or files from a device, staff members will consider if the material may constitute evidence relating to a suspected offence. In these instances, they will not delete the material, and the device will be handed to the police as soon as reasonably practicable. If the material is not suspected to be evidence in relation to an offence, staff members may delete it if:

- They reasonably suspect that its continued existence is likely to cause harm to any person, and/or
- The pupil and/or the parent refuses to delete the material themselves

If a staff member **suspects** a device **may** contain an indecent image of a child (also known as a nude or semi-nude image), they will:

- **Not** view the image
- Confiscate the device and report the incident to the DSL (or equivalent) immediately, who will decide what to do next. The DSL will make the decision in line with the DfE's latest guidance on [screening, searching and confiscation](#) and the UK Council for Internet Safety (UKCIS) guidance on [sharing nudes and semi-nudes: advice for education settings working with children and young people](#)

Any searching of pupils will be carried out in line with:

- The DfE's latest guidance on [searching, screening and confiscation](#)
- UKCIS guidance on [sharing nudes and semi-nudes: advice for education settings working with children and young people](#)
- Schools behaviour policy.

Any complaints about searching for or deleting inappropriate images or files on pupils' electronic devices will be dealt with through the school complaints procedure.

Tapestry Online Learning Journal

Policy Statement ~ Alderman Jacobs Primary School ensures that all children in Early Years have a personal 'Learning Journal' which records photos, observations and comments in line with the Early Years Foundation Stage (EYFS) to build up a record of each child's interests and achievements during their time in the EYFS.

Aims:

- To provide an online journal of every child's personal development, to understand their level of achievement, interest and learning styles and then shape their learning experiences for each child reflecting those observations.
- To illustrate children's development progress through the different ages and stages in the EYFS.

Key Roles and Responsibilities:

Each child's class teacher will be responsible for the compilation of children's learning journals. All Early Years practitioners within the setting may contribute observations to children's learning journeys.

Procedures

- Alderman Jacobs Primary School uses a secure online Learning Journal system (Tapestry), allowing staff and parents to access the information via a personal password protected login.
- Staff access allows input of new observations and photos or amendment of existing observations and photos.
- Parent access allows input of new observations and photos or the addition of comments on existing observations and photos - parent logins do not have the necessary permission to edit existing material.
- Observations added to the Tapestry system are moderated by class teachers before being added to the child's Learning Journal.
- Parents logging into the system are only able to see their child's Learning Journal. They can also view group observations which include their child.
- Parents sign an agreement to ensure they will not share or publish any images or observations from their child's Learning Journal on any social networking site to protect images of other children that may appear in any photos contained in their child's Learning Journal.
- The Learning Journal is only begun once the child has started in the school and parents have signed consent forms and completed the email request form.

- In groups observations other children are not referred to by name.
- Tapestry is not used as a general communication between Alderman Jacobs Primary School and home. A child's Learning Journal is a document recording their learning and development and parents may add comments on observations or contribute photos, videos or information about activities they have been doing at home. Parents may contact us through the usual channels for any other day-to-day matters, e.g. absence, lost property etc.

Security

- The Tapestry on-line Learning Journal system is hosted on secure dedicated servers based in the UK.
- Access to information stored on Tapestry can only be gained by personal email address and password.
- Parents can only see their own child's information and are unable to login to view other children's Learning Journals.

Training and Curriculum

It is important that the wider school community is sufficiently empowered with the knowledge to stay as risk free as possible whilst using digital technology; this includes updated awareness of new and emerging issues. As such, AJS will have an annual programme of training which is suitable to the audience.

Internet safety for students is embedded into the curriculum; whenever computing is used in the school, staff will ensure that there are positive messages about the safe use of technology and risks as part of the student's learning.

Children from EYFS to Y6 will have regular internet safety discussions, on a theme and promote honest discussions about the children's real life experiences.

As well as the programme of training we will establish further training or lessons as necessary in response to any incidents.

The computing leaders are responsible for recommending a programme of training and awareness for the school year to the Headteacher and responsible Governor for consideration and planning. Should any member of staff feel they have had inadequate or insufficient training generally or in any particular area this must be brought to the attention of the Headteacher for further CPD.

The-Internet Safety Training Programme is as follows:

All pupils - Regular internet safety sessions (recommend 3 per half term) discussing internet safety issues around a half termly theme. This will be incorporated into the statutory PSHCE curriculum from September 2020.

Parents - safety advice on website, internet safety annual event during the year (ideally in internet safety week in February but if not possible it should take place during the academic year)

Staff -Internet Safety annual training and annual PREVENT training-
