

# Engagement Plan: Early Years Spring Term 1- Colours of the World

## Early Years Foundation Stage

As Writers we will develop our segmenting skills and begin to write cvc words.

As Mathematicians we will be learning our number bonds to 5, forming numerals and beginning to record values.

As Readers we will be continuing with phonics in mixed groups, blending words with accuracy and consistency.

As Independent learners we will be focussing on discussing and investigating colours in a variety of practical and visual ways, noting similarities and differences.

## Curriculum Drivers

### Energy For Life

For our health, we will promote our school healthy eating policy and encourage healthy snacks at break time.

In sport, we will explore different ways of travelling, negotiating space and obstacles safely, with developing control.

### Energy for Learning

To demonstrate positive learning attitudes and show a 'can do' attitude.

We will read stories about diversity and explore similarities and differences between traditions and cultures.

### Energy for the Environment

To look after our classroom environment and tidy up after ourselves when we have finished an activity. E.g. washing up our paint palettes after use.

To take responsibility for our new outdoor resources at lunchtimes, keeping them safe and turn taking with others.
